Circuits, LLC announces UL 94V-0 Certification for Flexible Printed Circuit Boards

FOR IMMEDIATE RELEASE

July 1, 2011, Murrysville, PA, Circuits, LLC, a manufacturer of highly reliable flex and rigid flex printed circuit boards announced today that the company has received official notification from Underwriters Laboratories (UL) that it has been awarded 94V-0 certification for flexible PCBs manufactured at the site.

The UL 94-V0 certification awarded to Circuits fulfills UL flammability test requirements for Flammability of Plastic Materials for Parts in Devices and Appliances. Underwriters Laboratory (UL) is an independent not-for-profit safety testing and certification organization. Founded in 1894, UL has earned a reputation as a global leader in product safety standards development, testing and certification

According to Circuits' President, Adeodato Vigano "The achievement of this key certification marks yet another milestone for Circuits' commitment to continually expanding the services and capabilities offered for both new and existing customers." As flexible printed circuit boards find their way into more and more end applications, Circuits is now in a position to assist customers across all end markets requiring the UL flammability certification for flexible PCBs.

Circuits obtained their ITAR registration in 2009, ISO9001:2008 certification in 2010, and operates under a quality management system (QMS) designed to meet the requirements of MIL-PRF-31032 .

About Circuits, LLC

Circuits, LLC is a quality-driven, customer-focused manufacturer of highly reliable built-to-spec flexible printed circuit boards serving the defense, industrial, and medical markets with consistent quality and on-time delivery unsurpassed by competitors.
